

Homework – Build React APP

Create a self-promotional Single Page Application (SPA) using React.

The page should introduce you and present basic information about you.

Your application must include:

- Your name and image (any image)
- An About Me section
- Contact information (NO SENSITIVE DATA)
- At least 3 React components
- Nice CSS styling (can use resources like <https://codepen.io/tag/about-me>)

Deploy your application using GitHub Pages.

Submission

Attach:

1. GitHub repository link
2. Deployed application link
3. One screenshot of the application running in the browser
4. Press Turn In button before the deadline

P.S. Privacy:

Do not include sensitive or private information in the Contacts section.

Do not include your phone number or home address.

You may use safe information such as your GitHub link, Instagram handle, or something creative/fun instead.

For example:

Address: Planet Earth
